

Sequence logo for a 15-nucleotide DNA sequence. The sequence is 15 nucleotides long. The first 10 positions are highly conserved, with C being the most frequent nucleotide. The 11th position is highly conserved for G. The 12th position is highly conserved for T. The 13th position is highly conserved for G. The 14th position is highly conserved for G. The 15th position is highly conserved for C. The logo is color-coded: C is blue, G is yellow, A is green, and T is red.
